

THE TORAH'S Cycles of Divine Creation

Scribed into the TORAH via the

SHECHINAH'S (Divine Presence) Matrix

Life is the most inexplicable esoteric topic to discuss with anybody on the face of the earth. Everybody on the face of earth has their own goal to achieve; thus, they do not have the time to investigate the art of esotericism.

In December/January 1976/1977 I glimpsed that the first chapter of Genesis was written into a nine part circle. It took me another twenty-two months (October 1978) to gleam that the circle was actually a twelve part circle. Then it took me until April 11th 1983 to realize that the circle expanded out to 1584-cycles. When I studied these cycles I realized that the first two-chapters of Genesis was written out via the first eleven cycles. The first cycle is the Cycle of Darkness, which scribes the first two verses of Genesis. The first day of creation is the Cycle of Light.

Each of the twelve facets in each cycle represents a word writing the texts of Genesis. I have previously written a paper on the **Cycles of Divine Creationⁱ**. I advise the reader to read that paper and learn how the cycles emerged into the Torah. Every nanosecond of human life radiates out of the soul's two-part psyche ego-consciousness and the unconscious mind: **SHECHINAH'S (Divine Presence) matrixⁱⁱ** (I use to call it the Matrix of Wisdom) in the selfsame manner that these cycles radiate into the Torah's texts. The reader has to realize that the CYCLES OF DIVINE CREATION were codified into the Torah's texts; because, the cycles are analogous to how the SHECHINAH'S (Divine Presence) matrix is psychologically process instinctually via the cerebral lobes of the brain.

Below is another view of the first eleven cycles that scribes the first two chapters of Genesis. It is easily seen these cycles are created via Astrology. Over each of these cycles and the words in all twelve facets in the eleven cycles are other mythological patterns. Those that read the bible should read it very carefully.

The first cycle in the Torah is the CYCLE OF DARKNESS, which begin with the word BERESHITH בְּרֵאשִׁית and the last cycle is the CYCLE OF HELL. The first five cycles from the first two verses of Genesis to the end of the fourth day of creation are actually symbolized via the Triplicities of Astrology and beginning with the fifth day of creation to the end of the second chapter of Genesis is symbolized via the Quadruplicities of Astrology.

I have shown below all eleven cycles via the Triplicities and the Quadruplicities so that the reader can see Triplicities' and the Quadruplicities' patterns rising up out of the wording of the texts.

It will be shown below that the GRA Kabbalistic Tree of Life and the Star of David are symbolized in the GENESIS FORMULA and they are also outlined in the main body of the texts of the first chapter of Genesis. In addition it will be shown below that the GRA Kabbalistic Tree of Life and the Star of David are also inherent in the numerics of the Shechinah's (Divine Presence) Matrix.

The entire first and second chapters of Genesis are obviously commentaries on the first word of BERESHITH בְּרֵאשִׁית. The reason for this is; because, BERESHITH בְּרֵאשִׁית literally spells out the word CHRIST (krst) in Greek using Hebrew letters and BERESHITH בְּרֵאשִׁית also symbolizes the Holy Trinity. It is because the word BERESHITH בְּרֵאשִׁית symbolizes Christ and the Trinity, that the number seven (7) in each of the eleven cycles is the anchor number, which is the number that literally formats all eleven cycles.

THIS IS THE DEEPEST ESOTERIC SECRET IN THE JUDAEO CHRISTIAN RELIGIONS. THE INITIATE HAS TO PSYCHICALLY SYNC THESE PATTERNS, IF NOT; THE REST OF ESOTERICISM WILL BE COMPLETELY OUT OF SIGHT.

BERESHITH בראשית

And the

GENESIS FORMULA

The Judaeo Christian Scriptures are entirely scribed numerically: letter by letter, word for word. In a previous paper: **THE KUNDALINI SERPENT Symbolizes the New Testament rising up out of the Old Testamentⁱⁱⁱ**, I illustrated numerically in the paper just mentioned that each volume in the Old and New Testaments symbolizes an entire year; thus, with the seven volumes of the Apocrypha included into the Old and New Testaments there are a total of seventy-three (73) books symbolizing seventy-three (73) years. This symbolizes those years stretching out from 46BC to 27AD. The number seventy-three (73) is the gematria value of the third Hebrew letter: Ghimmel ג. The Hebrew letter Ghimmel ג is spelt many ways via Judaism and English.

“Our Sages teach that the *gimel* symbolizes a rich man running after a poor man, the *dalet*, to give him charity. The word "*gimel*" is derived from the word "*gemul*", which in Hebrew means both the giving of reward as well as the giving of punishment. In Torah, both reward and punishment have the same ultimate aim: the rectification of the soul to merit to receive G-d's light to the fullest extent.”^{iv}

I theorize that the Hebrew word BERESHITH בראשית (In the beginning”) can end and restart at anytime. At the end of 45BC another BERESHITH בראשית ended and in 46BC BERESHITH בראשית begins again and ends in 27AD; therefore, 28AD BERESHITH בראשית begins again and ends in 1560AD.

My theory centered on how Julius and Augustus Caesars created their calendars via the first word of Genesis BERESHITH בראשית and this was determined; because, the word BERESHITH בראשית stretches out to ten letters rather than six. I have discussed this theme in previous writing; but, essentially BERESHITH בראשית stretches out to ten letters symbolizing the unconscious mind and ego-consciousness contemplating and meditating (Active Imagination) together, in the skull, creating the Eternal Temple of God. I have named these ten letters the GENESIS FORMULA.

THE GENESIS FORMULA									
ד	י	ג	ק	ב	ר	א	ש	י	ת
4	1	3	1	2	2	1	3	1	4

In the image above, the yellow letters symbolizes the first word of Genesis BERESHITH בראשית and the four green letters symbolize the last four letters in THE GENESIS FORMULA.

The attentive initiate will see that the word BERESHITH בראשית is structured via a skip-pattern sequence; because, all the Hebrew letters in the GENESUS FORMULA are lowered (casting-out-nines) to their primary numerics. What made me envisage this numerical skip-pattern sequence was seeing the last three letters of the Hebrew Coder: **TAV ת (400)**, **SHIN ש (300)**, **RESH ר (200)**, in reverse sequential order entering the Torah formatting the word BERESHITH בראשית; whereas, the letter that is about to enter creation is **QOPH ק (100)**. **QOPH (100)** is the first of the four letters that spell out the word CHRIST (krst) in Greek using Hebrew letters: **TAV ת (400)**, **SHIN ש (300)**, **RESH ר (200)**, **QOPH ק (100)**. The four beginning letters of the Hebrew Coder: **DALEPH ד (4)**, **GHIMMEL ג (3)**, **BETH ב (2)**, **ALEPH א (1)** appear to be going out of the Torah sequentially in reverse order. And two of the same Hebrew letter **YUD י (10)** is seen stationary. One **YUD י (10)** stationary symbolizes ego-consciousness and the second **YUD י (10)** symbolizes the unconscious mind.

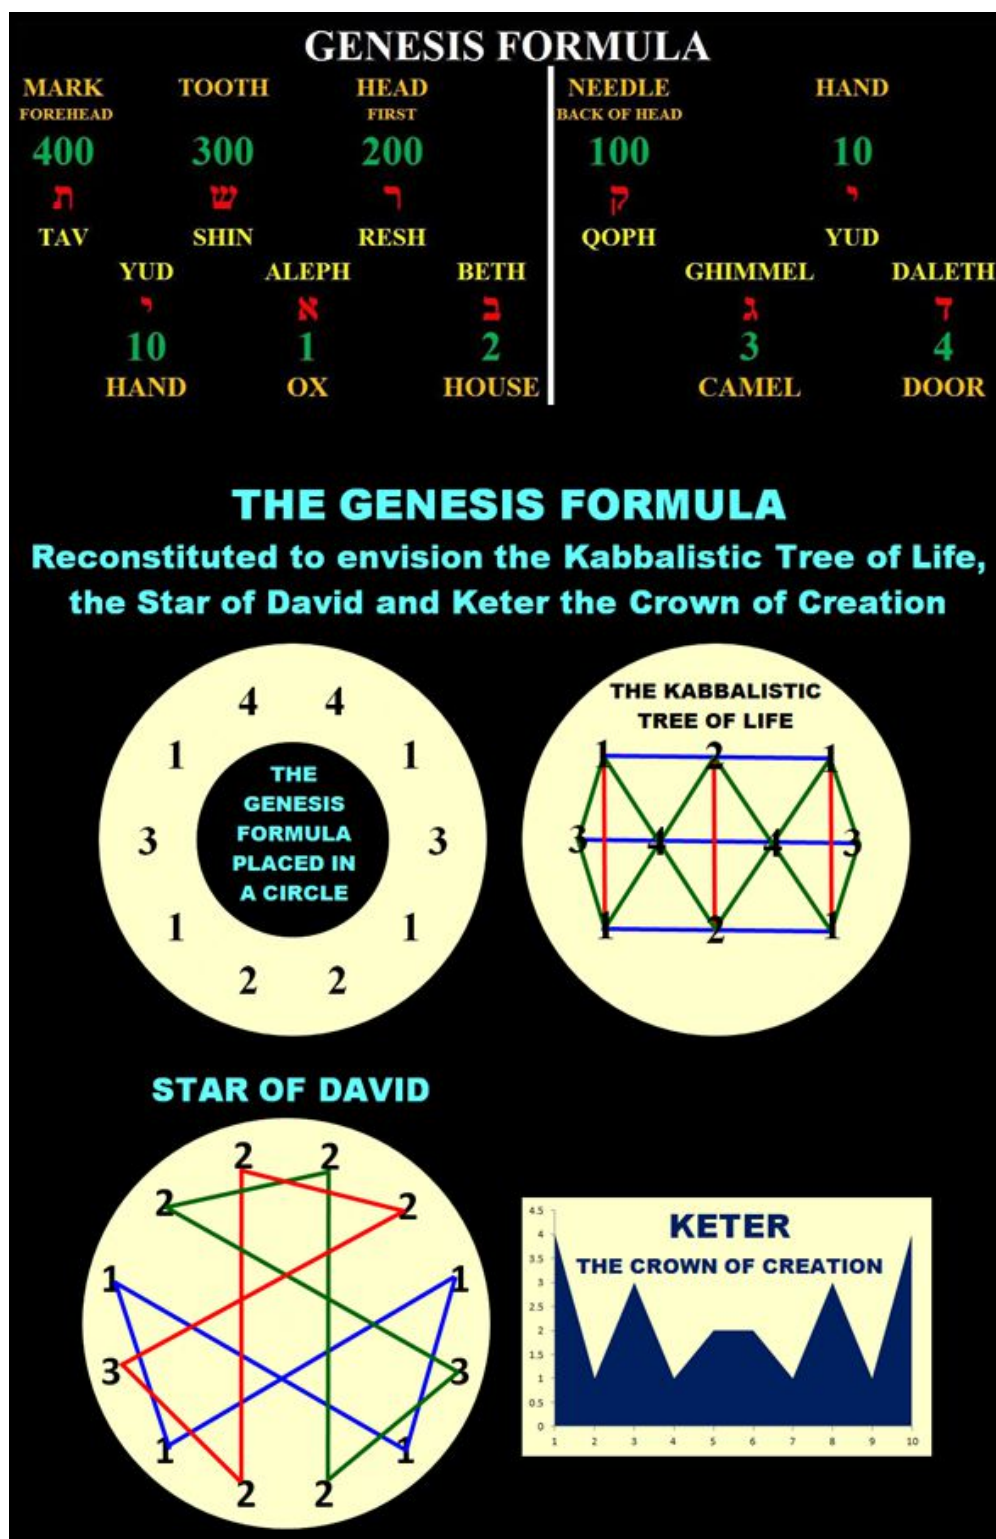

I am interpreting the Shechinah's (Divine Presence) matrix to symbolize ego-consciousness' materialistic thoughts entwining with the unconscious mind's cosmic thoughts: four cosmic letters: **TAV ת (400)**, **SHIN ש (300)**, **RESH ר (200)**, **QOPH ק (100)** via Active Imagination transforming into the Eternal Temple of God: study the three images below. The third image is in the same architectural shape as Chartres Cathedral and most other Catholic Church's cathedrals.

Shechinah (Divine Presence) MATRIX OF WISDOM																		
Ego-consciousness									Unconscious mind									
9	9	9	9	9	9	9	9	9	9	9	9	9	9	9	9	9	9	9

Christ consciousness																		
Tree of Life																		

In the images below I illustrate the GENESIS FORMULA'S numerics place into a cyclic format and it was easy to envisage the GRA Kabbalistic Tree of Life, the Star of David in the Zodiac/Calendar year, and Keter: the Crown of Creation.

The Star of David in the GENESIS FORMULA symbolizes the Zodiac/Calendar year; though, this is not what appears to be outline via the GENESIS FORMULA'S numerics; however, study the four #1s in the Star of David. The two fours are split into four twos expanding the numerical count to twelve. The first #1 symbolizes the first Astrological sign Aries (1), the second #1 symbolizes the third (3rd) Astrological sign Gemini (3), the third #1 symbolizes the sixth Astrological sign Virgo (6), and the fourth #1 symbolizes the eighth Astrological sign Scorpio (8); thus, all four #1s format a butterfly pattern. All eight other Astrological signs format two other butterfly patterns; thus, all three butterfly patterns format the STAR OF DAVID. Now the reader should compare these numerical patterns with the Zodiac/Calendar year that is used in modern times: modernity. This is the pattern that Julius and Augustus Caesars used in formatting their calendar years.

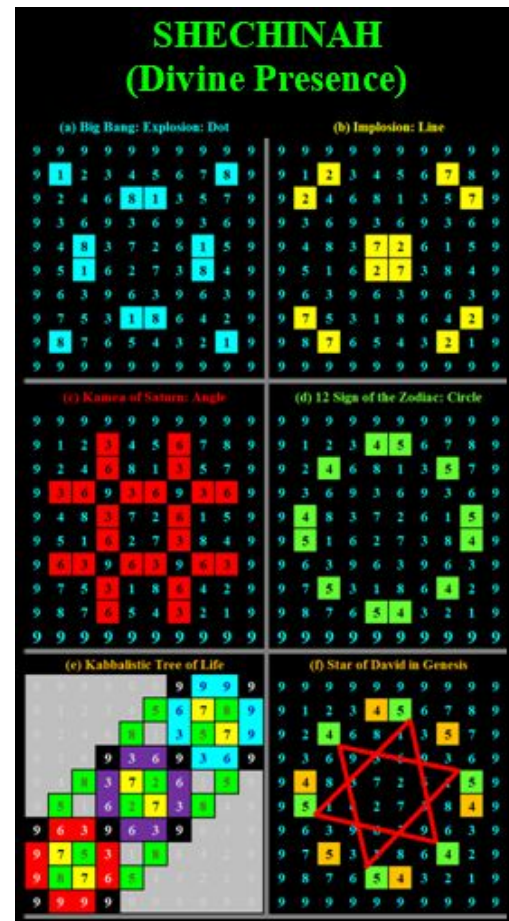

In the image below on the ninth page it outlines Astrology, in the first four chapters of Genesis, symbolizing the Zodiac/Calendar year, which is in the format of the cerebral lobes of the brain.

The first word of Genesis BERESHITH בְּרֵאשִׁית that transforms into the GENESIS FORMULA was formatted via the Shechinah's (Divine Presence) matrix that transformed into the Eternal Temple of God.

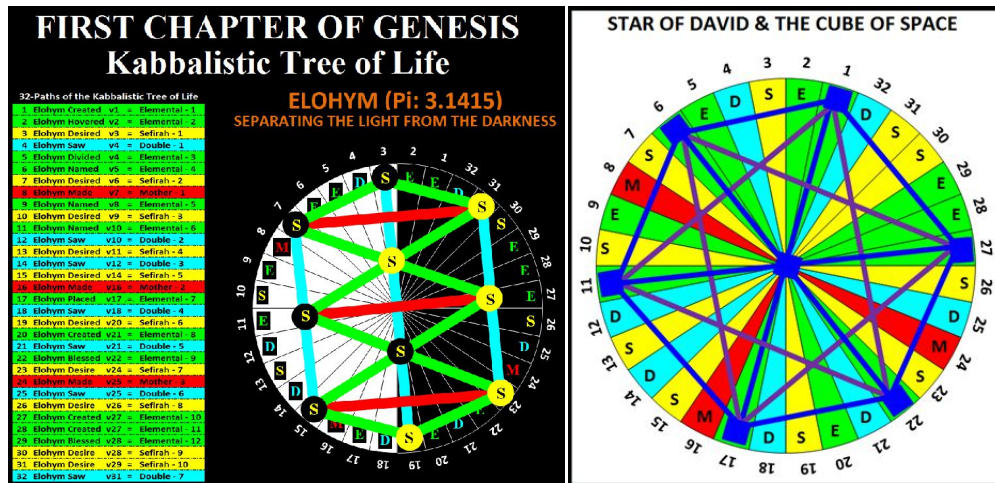

The image above shows that the Shechinah's (Divine Presence) matrix has multiple images that symbolize the first four days of creation: Earth, Air, Water, and Fire, which symbolizes LIGHT.

Envisaged in the Shechinah's (Divine Presence) matrix are the images of GRA Kabbalistic Tree of Life and the Star of David. These images are not only symbolized in the GENESIS FORMULA, but also symbolized in larger images in the main texts of the first chapter of Genesis: study the two images below.

The GRA Kabbalistic Tree of Life and the Star of David in the two images below are mathematically structured into the texts of the first chapter of Genesis via the word ELOHYM that is used thirty-two (32) times. It will be seen that both the GRA Kabbalistic Tree of Life and the Star of David are merged together.

In the first image below is a list of the thirty-two Elohyms and their associate words. It will be seen that the SEFERIAHS are pattern in five sets aligned with the word SAID/DESIRED. Four sets are one-hundred and eighty degree (180°) from one another: these eight SEFERIAHS format the GRA Kabbalistic Tree of Life's framework. The other two SEFERIAHS are not aligned to each other; rather, they are centered to the Kabbalistic Tree of Life.

The GRA Kabbalistic Tree of Life codified to the first chapter of Genesis is patterned into the same format as that envisaged in the Shechinah's (Divine Presence) matrix.

The three MOTHER letters have one set of two "Elohyms made" aligned to each other one-hundred and eighty (180°) degrees from one another.

The seven DOUBLE letters have none of the "Elohyms saw" aligned one-hundred and eighty (180°) degrees from one another.

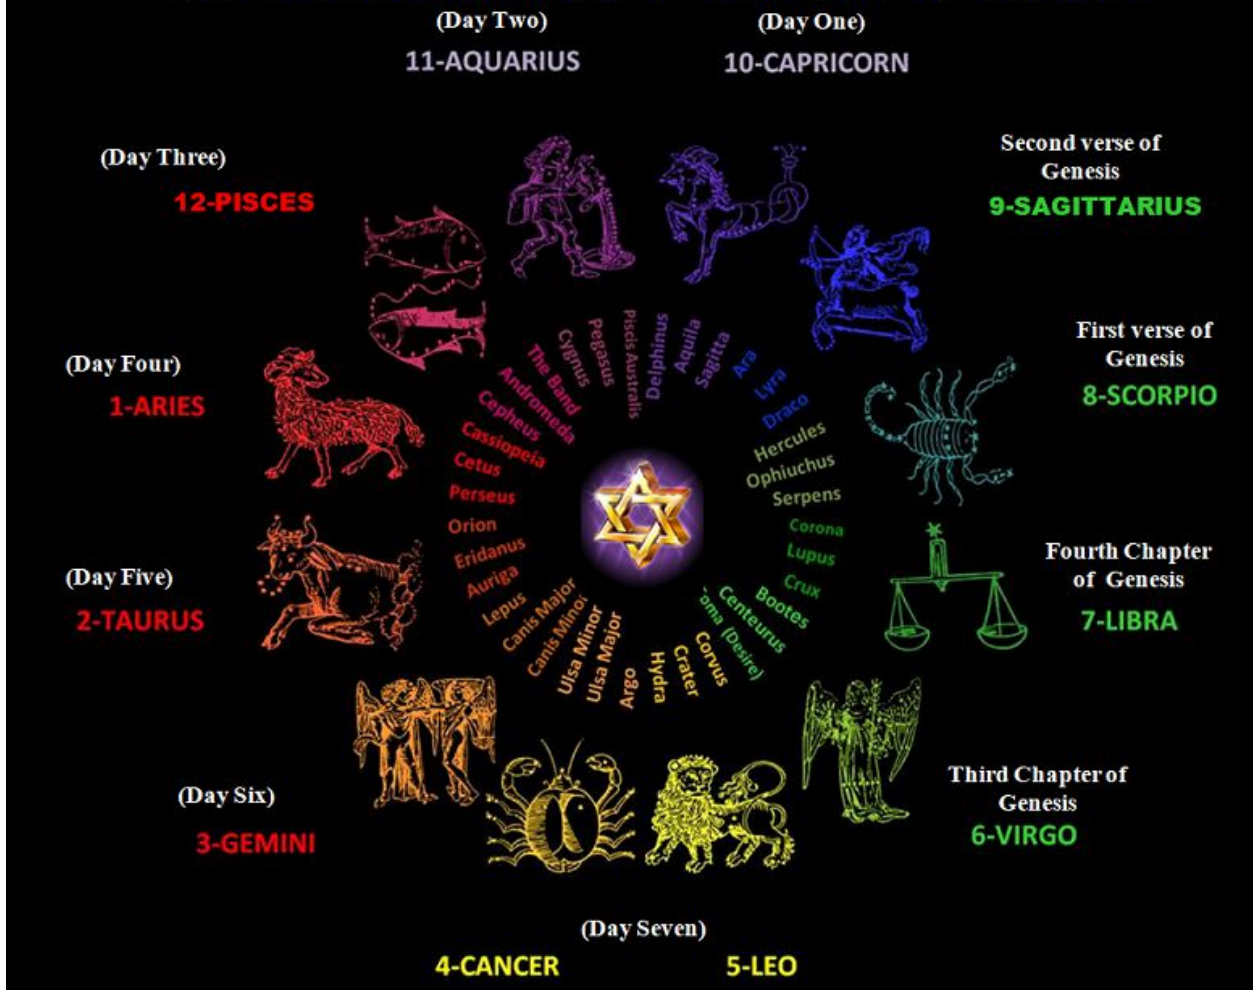

The twelve SINGLE (Elemental) letters have various associate words aligned to the word Elohyms. Six out of the twelve letters are aligned via three sets 180° from one another formatting the STAR OF DAVID. The STAR OF DAVID in the first chapter of Genesis is perfectly align mathematically to the first chapter of Genesis via four or five spaces as it is mathematically aligned to the number four and five in the Shechinah's (Divine Presence) matrix.

The above image symbolizing the Star of David shows the Star of David within a cube. Only in the material world's thought patterns create squares and cubes.

Thus, these above images illustrating the Shechinah's (Divine Presence) matrix demonstrates that the matrix is much older than the Torah. The Torah is scribed via what is envisaged from out of the Shechinah's (Divine Presence) matrix.

FIRST FOUR CHAPTERS OF GENESIS

THE ZODIAC AND THE 36-DECANS

Pisces, Aries, Taurus, and Gemini symbolize the Left Parietal and Temporal Lobes of the Brain symbolizing ego-consciousness, These four signs of Astrology symbolizes the third, fourth, fifth, and sixth days of creation.

Cancer and Leo symbolizes the Frontal Lobes of the Brain: this later is important to grasp; because, in Day Seven of Creation the word Yahweh and Elohyim align to each other: i.e. Yahweh Elohyim, symbolizing ego-consciousness (Yahweh) contemplating and mediating via Active Imagination with the unconscious mind (Elohyim) formatting Christ consciousness: Eternal Temple of God, No part of the bible can be written outside of Christ consciousness.

Virgo, Libra, Scorpio, and Sagittarius, symbolizes the Right Parietal and Temporal Lobe of the brain symbolizing the unconscious mind. These four signs symbolizes chapter three and chapter four and the first two verses of Genesis.

Capricorn and Aquarius symbolizes the Occipital Lobes of the Brain; because, mysteriously from past memories and the Unknown God cleansing those memories 'new beginnings' begin; because, the Frontal Lobes of the Brain: Cancer (unconscious mind) and Leo (ego-consciousness) contemplate and meditate with each other via Active Imagination (Christ consciousness). That new information (cleansed memories) creating 'new beginnings' emanates out of the Left (ego-consciousness) and Right (unconscious mind) Parietal Lobes of the Brain: it is as if all cerebral lobes of the brain are actively participating with each other via Christ consciousness (Active Imagination).
