GRA TREE OF LIFE

I write this paper; because, throughout the internet and many books and videos on the Hebrew Coder and the Kabbalistic Tree of Life give nothing more than disinformation, to deceive the uninitiate (those that do not study and research the sacred scriptures).

Most people believe that what they read, about religion, is absolute truth; but religious leaders and mystery schools initiates believe they have the right to write disinformation about what they have learned about the Esoteric Science to defraud the uninitiate; however, they are prohibited from doing so in sacred geometry, artworks, architecture.

The sacred scriptures are not merely the Old and New Testaments; because, they are all tightly terse documents, which contains the spiritual secrets of life; but additionally, the sacred scriptures are also the ancient commentaries on the Old and New Testament (notice I did not say modern commentaries). Also, artworks and architectural structures also are considered the sacred scriptures; because, they are basically commentaries on the Old or New Testaments.

Those that study the Old Testament should read the three Targums and the Zohar for clues to how to discern the Esoteric Secrets embedded in the Old Testament. Those that study and research the New Testament should read and study the ancient Christian saints.

For quite some time I, personally, did not know which Hebrew letters were the Mother letters, Double letters, or the Single letters and I did not know how the Hebrew Coder aligned to the Kabbalistic Tree of Life.

However, I did on my own volition discovered the sacred geometry of the GRA Kabbalistic Tree of Life in the first chapter of Genesis; but that was a few decades ago and the image of the list of 32-Elohyms in sequential order from the first to the last verse of the first chapter of Genesis is listed above along with placing the 32-Elohyms in a circular pattern. I learned a great deal of this on researching in Dante Alighieri's La Divina Commedia's Mathematical System where I discovered he used the Shechinah (Divine Presence) to structure his entire 100-chapter poem. I initially called the matrix the MATRIX OF WISDOM, which I learned was known all over the world by all cultures in all times and climes. Later I would name it the Shechinah (Divine Presence); because, that is what Judaism calls it. Below on the next page many images are seen coming out of the

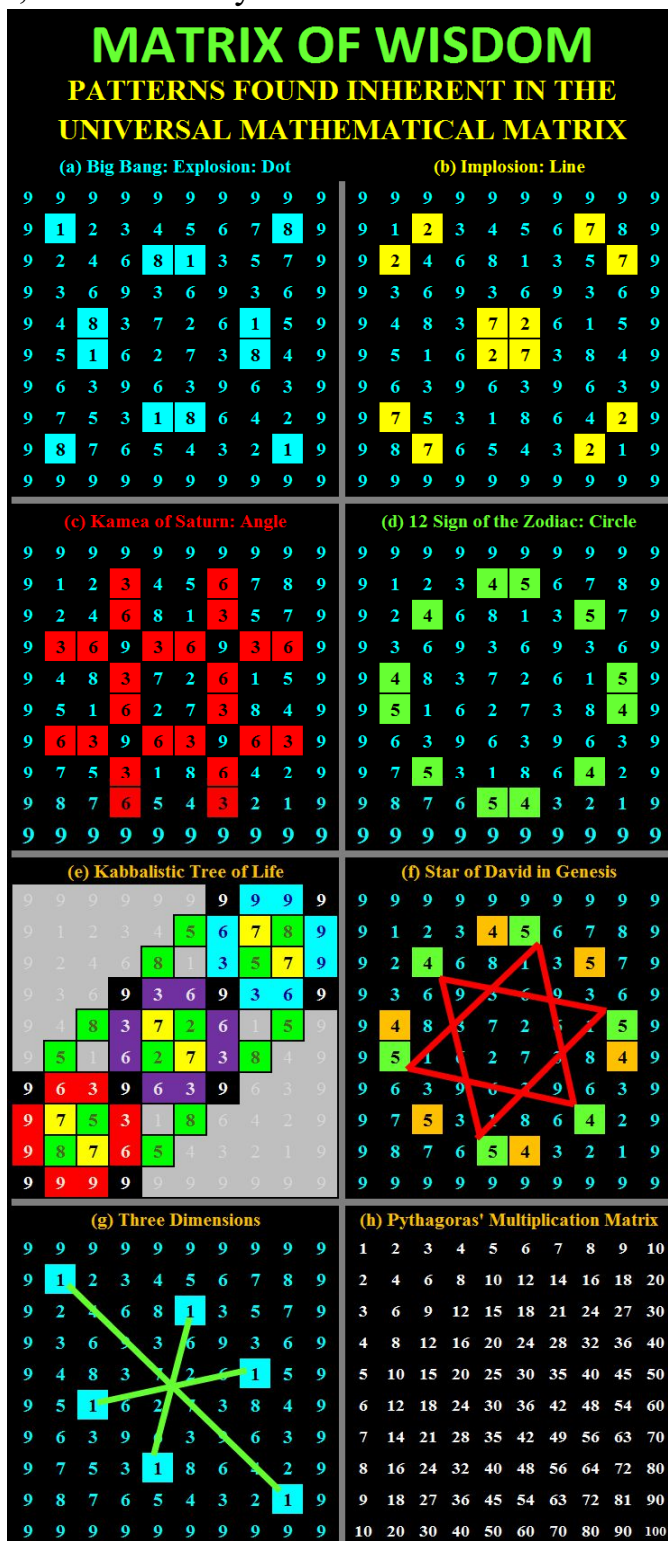

Shechinah

Shechinah's (Divine Presence) matrix, which clearly illustrates where the GRA Kabbalistic Tree of Life and the Star of David originated from. In the image to the right both the GRA Kabbalistic Tree of Life and the Star of David can be envisaged in the Shechinah's (Divine Presence) matrix. Those that study and research these images in reference to the 32-Elohyms in the first chapter of Genesis it will envisage that they were deliberately codified via sacred geometry from the Shechinah's (Divine Presence) matrix. That along proves that all the sacred scriptures around the world are secondary sources of the WORD OF GOD.

Thus, it was not difficult to discover the GRA Kabbalistic Tree of Life in the first chapter of Genesis; because, ten Elohyms SAID/DESIRED, three Elohyms MADE, seven Elohyms SAW, and another twelve Elohyms used various others words, which is the precise pattern of ARI Kabbalistic Tree of life.

However, Ari Tree of Life is very slanted in how the Hebrew Coder is aligned to the single letters. Rarely can an ARI Tree of Life be found with the Hebrew letters SHIN ך, ALEPH א, and MEM ם as the MOTHER letters and that is why I have chosen that image to put forth in this paper to compare with the GRA Tree of Life; because, these three letters total to three-hundred and forty-one (341), which is the transposition of the short formula for PI 3.14.

In the chart above is the Hebrew Coder in sequential order from ALEPH א to TAV ט; therefore, I colored coded the Hebrew Coder from that perspective; because, I discovered that chart on the internet.

There is nothing out of alignment in the ARI Tree of Life with the ten Sefirahs, three Mother letters, and seven Double letters; however, the misalignment comes from the twisted realignment of the twelve Single letters (twelve astrological signs).

Those that studies the Hebrew Coder sequentially when studying the GRA Tree of Life will see that all the Hebrew letters are in sequential order beginning with ALEPH א and ending with TAV ט.

Those that have read my previous papers and/or books would have envisaged a great deal more esoteric secrets from out of the first chapter of Genesis.

I wrote this paper; because, it is obvious, at least to me, that the first chapter of Genesis teaches the initiate the Hebrew Coder and how it sequentially aligns to the GRA Kabbalistic Tree of Life.

The first chapter of Genesis has four-hundred and thirty-four (434) Hebrew word, which the gematria value of the fourth Hebrew letter DALETH ד, which symbolizes the DOOR to the realm of paradise. Christ said in the New Testament, "I am the door".
