

# THE KUNDALINI SERPENT

## Symbolizes the New Testament

### Rising up out of the Old Testament

**T**hough, I have written about this thesis of the Kundalini Serpent in other papers, I am rewriting it again, in this paper, separating it from the entire thesis of the other paper.

Those that have read some of my other papers will know that I have shown that the Kundalini Serpent is symbolized in the first four chapters of Genesis twice. This paper is not discussing those chapters' accounts of the Kundalini Serpent.

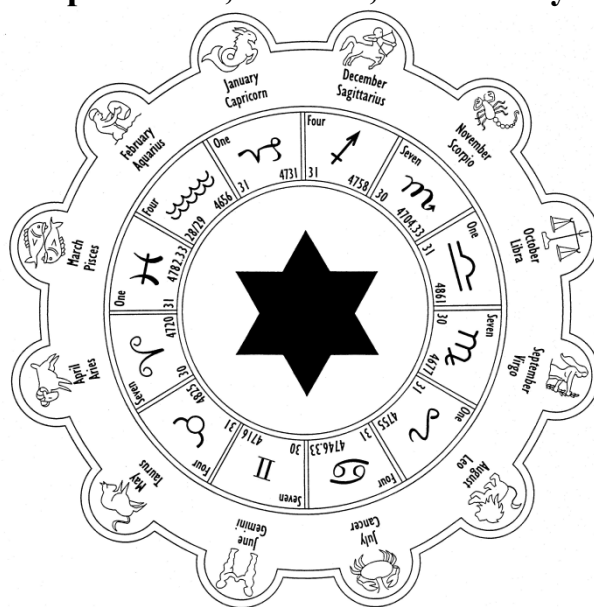

Rather, this paper is about the mathematics of all the chapters in the Old Testament (929-chapters), Apocrypha (7-books), and the New Testament (260-chapters).

The Judaeo-Christian Scriptures are based solely upon the birth of Christianity: Christ consciousness. The Old Testament has thirty-nine (39) books, Apocrypha has seven (7) books, and the New Testament has twenty-seven (27) books.

It is far too coincidental that Julius Caesar introduced the Julian calendar on January 1<sup>st</sup> 46BC and that Augustus Caesar introduced his revision of the Julian calendar on January 1<sup>st</sup> 8BC. That is precisely thirty-eight (38) years apart from each other. Thirty-eight years is one grand Luna Cycle; though, most people believe that every grand Luna Cycle is every nineteen (19) years. That is a falsehood; though, academia wants to educate the world that the grand Luna Cycle, through misinformation, is nineteen (19) years. Each nineteen (19) year period ends with either minus a half day or plus a half day to complete a nineteen year period and that is why the grand Luna Cycle is, in point of fact, thirty-eight (38) years.

The reason that this information is important is; because, on January 1<sup>st</sup> 8BC the Star of David appeared in the Augustus Caesar's revision of the Julian calendar. To the right is an image I engaged an artist to create; because, it represents Dante Alighieri's mathematics in his trilogy: La Divina Commedia (The Divine Comedy)<sup>i</sup>. Dante created the Star of David in his mathematic aligned to the Zodiac/Calendar Year.

There are four months with thirty (30) days: April (1<sup>st</sup> sign), June (3<sup>rd</sup> sign), September (6<sup>th</sup> sign), and November (8<sup>th</sup> signs) formatting a butterfly pattern; whereas, the other eight months also create another two butterfly patterns and when all three butterfly patterns are put together they format the Star of David. Exactly two years later from January 1<sup>st</sup> 8BC the Three Wise-men that followed a star for two years visited Jesus Christ as a child on January 1<sup>st</sup> 6BC; because, Jesus Christ was born on December 25<sup>th</sup> 7BC.

*I advise readers to actually do the mathematics outlined above to confirm and validate how this calendar's Star of David is the star that the Three Wise-Men followed for two years. The Three Wise-Men knew that the God that would be born would be Jewish; because, the Star of David is Judaism basic symbol.*

What is also important to know is that John the Baptist was conceived on October 1<sup>st</sup> 6BC and born on June 24<sup>th</sup> 7BC and circumcised on July 1<sup>st</sup> 7BC; whereas, Jesus Christ was conceived on April 1<sup>st</sup> 7BC and born on December 25<sup>th</sup> 7BC and circumcised on January 1<sup>st</sup> 6BC, and then Jesus Christ died in 27AD.

Academia gives further misinformation by saying that Jesus Christ was born on January 1<sup>st</sup> 1AD: i.e. the beginning of the Common Era.

What puts all this together illustrating the creation of the Christian era is the fact that in the thirty-ninth (39<sup>th</sup>) book of the Old Testament called Malachi talks about Elijah returning. In the New Testament Jesus Christ tells his disciples that John the Baptist is Elijah that returned; thus, it is obvious that the thirty-ninth (39) books of the Old Testament is actually a volume that belongs to the New Testament.

Malachi has four chapters, which would increase the New Testament to two-hundred and sixty-four (264) chapters. The Old Testament reduces to

nine-hundred and twenty-five (925) chapters. When the reader reads the last chapter of Zachariah it talks about Mount Olive splitting in half north and south and then from west and east. Mount Olive never split up like that; thus, it illustrates that the entire bible is written in mythological code. This makes the last chapter of Zachariah the pivotal chapter of the Old and New Testament; thus, when nine-hundred and twenty-four (924) chapters are divided by two-hundred and sixty-four (264) chapters:  $924 / 264 = 3\frac{1}{2}$  the coiled Kundalini Serpent is viewed mathematically rising from the Old Testament; thus, the mathematics portrays the New Testament as the Kundalini Serpent (energy).

I understand that the mathematics of the seven (7) books of the Apocrypha do not seemingly align with the mathematics of the Kundalini Serpent arising from the Old Testament. Those eight (8) years from January 1<sup>st</sup> 8BC to January 1<sup>st</sup> 1AD align to the dawn of Christianity.

Also it is no coincidence that Julius Caesar symbolizes the month of July Cancer (Moon) and Augustus Caesar symbolizes the month of August: Leo (Sun) the lion. The spelling of Julius and Augustus Caesars' names in regards to the spelling of the calendar months they are named after is no coincidence.

It is my theory that the seven (7) books of the Apocrypha mathematically symbolize the Seven Light Chakras that the Kundalini Serpent rises upon to create the twenty-seven (27) books of the New Testament, which is in the *anno Domini (AD)* era. Twenty-Seven (27) is the transposition of the number two-hundred and seven (207), which is the gematria value of the word LIGHT in the first and fourth days of creation outlined in the first chapter of Genesis.

The *anno Domini (AD)* era symbolizes LIGHT that obviously symbolizes the *before Christ (BC)* era as DARKNESS.

There is a great deal more about the STAR OF DAVID that is derived directly from the first word of Genesis BERESHITH בְּרֵאשִׁית; but, I will not go there in this paper; though, I have written about it in other papers.

The Old and New Testament represents the Kundalini Serpent (energy). The book of Malachi added to the New Testament symbolizes impregnating the entire Judaeo Christian Scriptures: Old Testament reduced to  $38 = 11 = 2$ , Apocrypha 7, and New Testament  $27 + 1 = 10 = 1$ ; thus, 271 is the gematria value of pregnant: that is no coincidence. That is why the first verse of Genesis totals to two-thousand seven-hundred and one (2701); thus, that is why the whole of the Judaeo Christian Scriptures symbolizes the Kundalini Serpent.
