

JUDAEO CHRISTIAN SCRIPTURES: HOW and WHY they were written Esoterically and Exoterically

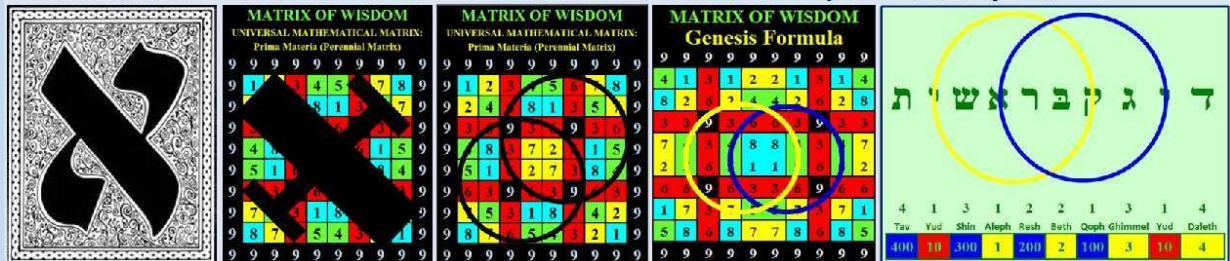

William John Meegan

INTRODUCTION

There is an ancient Jewish tradition that says that the Torah was written before creation commenced. That of course is a very intriguing and interesting premise to put forth if the initiate of course knew what that tradition was all about; however, there is nobody yet that has provided any information whatsoever that would validate that assertion; for the reason that, basically nobody knows what the tradition means. The excuse is always, “you got to believe in faith”. To me, Faith without Works is nothing more than trash in the garbage can. An initiate believing in something or anything, which he or she has no idea what it is all about has neither materialistic value nor an effective psychic force that could possibly benefit the initiate.

“What does it profit, my brethren, if someone says he has faith but does not have works? Can faith save him? If a brother or sister is naked and destitute of daily food, and one of you says to them, “Depart in peace, be warmed and filled,” but you do not give them the things which are needed for the body, what does it profit? Thus also faith by itself, if it does not have works, is dead (James 2:14-17).”

ALEPH . MERKABAH . VESICA PISCIS . GENESIS FORMULA

In the last four decades I have conducted a great deal of research on the sacred scriptures via numerics, words and images. Though, it will not be believe, I have discovered some of the ancient secrets of how the bible was written. I am more interested in valid facts and demonstrable evidence than continuous rhetoric that says nothing, nor do I listen to scholars that provide countless theories without evidence to validate them, nor do I consider hubris' assumptions, which are the fantasies of whomever.

These images displayed above literally illustrates via the scriptural writings of the ancient sages exactly how creation began; however, the laity will never see this kind of sacred geometry; because, their unworkable faith will never-ever allow them to question the sacred scriptures as to what it is saying. The laity feels that there is no need for them to question the WORD OF GOD if the so-called religious hierarchy is allegedly doing all the research for them.

Actually, the Roman Catholic Church did do that spiritual research back in ancient times and their great gift to the laity was to leave it all behind anonymously in numerics, words and images outlining the WORD OF GOD to perfection; however, modern diocesan priests do not research the bible nor do they know anything about esotericism in the sacred scriptures and/or Catholicism's artworks; thus, the laity is as ignorant as its diocesan priests. The reason diocesan priests do not have the time to do biblical research is because they spend 100% of their waking hours doing the work of the secular government. Religion is technically neither a charitable institution, entertainment program nor a networking outfit; nonetheless, that is all modernity believes religion is all about. I, personally, believe that government officials privately sit back and laugh at the religious hierarchy for spending the majority of their monetary resources on what the government per se should be providing its poor and downtrodden citizens.

ALEPH א is the first letter of the Hebrew Coder; because, it symbolizes “in the beginning” just as the first word of Genesis: BERESHITH is translated “in the beginning.” ALEPH א is also a very silent letter, which cannot be uttered in the vernacular; for the reason that, ALEPH א symbolizes the Trinitarian Paradigm: Trinity. The entire WORD OF GOD is present within the soul of the initiate; however, to understand the WORD OF GOD it has to be spiritually earned.

One of the major secrets about the Torah is that it is written in three parts, which the Hebraic letter ALEPH א symbolizes; thus, there are three Torah (sacred scriptures) not one.

✚ **FIRST** is the REVEALED (ARCHTYPAL): Trivium: three Grammatical Art: Grammar, Rhetoric and Logic/Dialectics: the surface mythoi of the sacred scriptures.

- The surface storyline of the Torah (Old and New Testament) is how 99.999% of the Judaeo Christian world is educated into their pagan religious beliefs.
- The surface mythoi of the sacred scriptures reads out logically as if it is a Common Sense way of expressing what is thought to be history.
- Translations of the Torah into innumerable languages are thought to be acceptable renditions of the original Hebrew (Old Testament) and Greek (New Testament).
 - From a materialistic perspective the ARCHETYPAL symbolizes the raw animal gorging on the world: i.e. it is anti religious.
 - From a religious perspective the Trivium is juxtaposition to the numerics of the Hebraic and Greek Coders.
- The ARCHETYPAL symbolizes the first nine Hebraic letters, which find it difficult to rise to the level of the EXISTENTIAL. The EXISTENTIAL is ten times the numerics of the ARCHETYPAL and the COSMIC is ten times the numerics of the EXISTENTIAL and one-hundred times that of the ARCHETYPAL.
 - Thus, the ARCHETYPAL does have a possibility of reaching the EXISTENTIAL, which is ten times its value; but, has no hope of reaching the COSMIC, which is one-hundred times its value without first overcoming the EXISTENTIAL.
 - The EXISTENTIAL does have the chance of reaching the COSMIC consciousness; because, the COSMIC is ten times its numerical values just as the EXISTENTIAL is ten times the value of the ARCHETYPAL.

✚ **SECOND** is the **COVERED (EXISTENTIAL)**: Quadrivium: four mathematical sciences: Arithmetic, Music/Harmony, Geometry and Astronomy/Astrology.

- Every single Hebrew letter in the Old Testament and every single Greek letter in the New Testament is numerically numbered and given a symbol along with definitions (deliberately plural) and commentaries (deliberately plural) on every letter.
- Additionally, the words, verses, chapters and books are numerically and mathematically structured secretly coding sacred geometry to the textual word-count.
- Translations of the Torah into innumerable languages rip out the symbolism and the numerics in the **WORD OF GOD**; thus, the **WORD OF GOD** is destroyed in translation.
 - However, I should mention that the only time that I, personally, have witnessed the esoteric **COVERED** being carried over via translation is the Kabbalistic Tree of Life via 32-Elohym (mentions of the word **GOD**) in the first chapter of Genesis.

✚ **THIRD** is the **HIDDEN (COSMIC)**: when the **FIRST** and **SECOND** Torahs are harmoniously juxtaposition to each other it is possible to understand the silent **WORD OF GOD**.

- The **HIDDEN WORD OF GOD** cannot be conveyed either by the human vernacular or by any other human methods.
- The **WORD OF GOD** is silent and only can be conveyed to the initiate via the Holy Spirit.

ALEPH א is structured with two **YUDs** י flanking a **VAV** ו. The Gematria value of the two **YUDS** י (10 X 2) and one **VAV** ו (6) is twenty-six (26), which is the Gematria value of the word **YAHWEH** יהוה. Interestingly, the two **YUDs** י spells out and enumerates the Gematria value of forty (40) and the **VAV** ו spells out and enumerates the Gematria value of twenty-two (22), which comes to the total of sixty-two (62) that is the transposition of the number twenty-six (26): the Gematria value of **YAHWEH** יהוה.

ALEPH א having the two **YUDs** י flanking the **VAV** ו: one in the upper right and the other in the lower left. There is little doubt that the symbolism is suggesting that the upper and lower **YUDs** י appear to be linking themselves to the central **YUD** י position between the two **VAVs** ו in the spelling of the word **VAV** ו: i.e. Vav ו (6) Yud י (10) and Vav ו (6). This of course would be a misinterpretation of the symbol.

ALEPH's א two **YUDs** י have been interpret by Arizal to represent “the waters above the heavens and the waters beneath the heavens” and **VAV** ו to symbolize the firmament between the two **YUDs** י as outlined in the second day of creation¹. This latter does make a great deal of sense when considering the first verse of Genesis: “*In the beginning Elohim separated the Heavens and the Earth*” couple with the second day of creation.

The two **YUDs** י are touching the firmament (**VAV** ו), which Eve saw as the commandment of Elohim not to touch the Tree of the Knowledge of Good and Evil. Remember that the Tree of the Knowledge of Good and Evil is in the center of the Garden of Eden.

The **YUD** י in the upper right of **ALEPH** א symbolizes ultimate good; whereas, the **YUD** י in the lower left symbolizes ultimate evil. The **VAV** ו in the center of the construct of **ALEPH** א symbolizes the Merkabah. The two **VAVs** ו in the construct of the letter/word **VAV** ו symbolize the two wheels of the Merkabah and the **YUD** י in the center of **VAV** ו

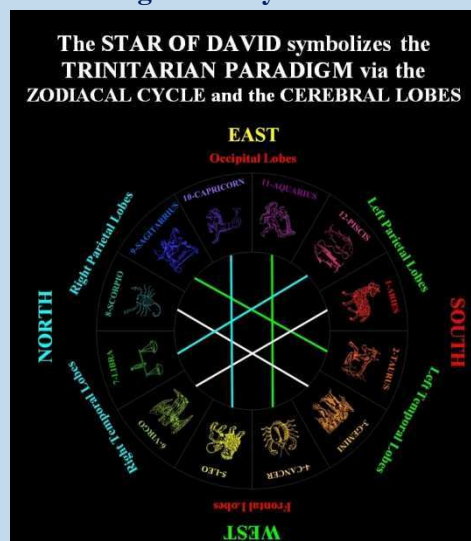

MATRIX OF WISDOM

9	9	9	9	9	9	9	9	9	9

¹ THE HEBREW LETTERS: Channels of Creative Consciousness (pg. 24), by Rabbi Yitzchak Ginsburgh, published in 1990 by Linda Pinsky Publications

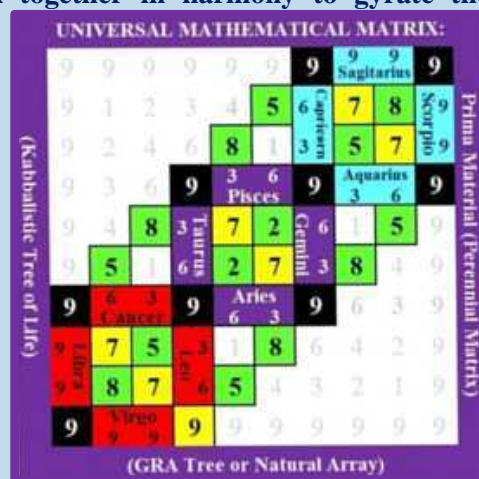

symbolizes Christ sitting on the throne in the center of the Merkabah. The two VAVs each have six-spokes that create the Star of David (wheel) in the north end of the firmament and the Seal of Solomon (wheel) in the south end of the firmament. This is because King David gathered the material to make the Temple and King Solomon builds the Temple from that material. This is symbolically well displayed in Chartres Cathedral via the Rose Windows in the north and south transepts.

The Star of David that radiates out from the Zodiac's twelve signs clearly shows how the Merkabah of the psyche works. The four months/signs with 30-days symbolizes Christ consciousness (white lines) that do not actually touch the east-west corridor of time; though, the seat of the Merkabah is centered there, which infers the creation of the Garden of Eden; however, notice how the blue and green lines do touch the east-west corridor of time: they literally create the east-west corridor of time. I have named it the east-west corridor of time; for the reason that, both Capricorn and Aquarius is in the east (occipital lobes), which are governed by the Sun Sign, Saturn: Father of Time. Going down the center of the brain towards the west both Leo and Cancer symbolizes ego-consciousness and the unconscious mind (frontal lobes). The four signs on the north side: Virgo (Mercury), Libra (Venus), Scorpio (Mars) and Sagittarius (Jupiter) radiate across to the south harmonizing with their opposites: Gemini (Mercury), Taurus (Venus), Aries (Mars) and Pisces (Jupiter). What this symbolizes is that the four signs in the south write the Judaeo Christian Scriptures. The first eleven chapters of Genesis symbolize Gemini (twins): Yahweh and Elohim, the rest of the Old Testament symbolizes Taurus (Bull) and Aries (Ram) and the New Testament symbolizes Pisces (Fish).

All three groups: white, blue and green lines work together in harmony to gyrate the tetrahedral forces of creation to obtain Christ consciousness; however, the moment that Eve (north) speaks to the serpent (degraded Adam to Satan - south), without the agreement of Christ consciousness the Garden of Eden will vanishes.

This accompanied image of the MATRIX OF WISDOM illustrates how the Zodiac/Calendar year in relationship to the Kabbalistic Tree of Life, which is fully laid out as sacred geometry in the first chapter of Genesis. The Torah (Old and New Testament) has always been known as the Garden of Eden and that is why Gemini, Taurus, Aries and Pisces are in the center of the MATRIX OF WISDOM as if they symbolized the Holy of Holies. It is as if the Holy of Holies symbolizes Christ consciousness. It can be conceptualized why Yahweh Elohim gave Adam the commandment not to eat of the Tree of the Knowledge of Good and Evil. The only consciousness that is allowed is the sacred scriptures: Christ consciousness.

What most readers will not envisage conceptually is that this Star of David created by the zodiacal cycle is merely the north end of the Merkabah; whereas, the south end of the Merkabah via the calendar year creates Solomon Seal the second wheel of the Merkabah. It is the reader responsibility once the symbolism of the bible is envisaged to use his or her intellect to cull out the rest of the data. This is why the first chapter of Genesis has six days of creation; because, they symbolizes six months: January to June; whereas, the second, third and fourth chapters of Genesis

and the first two verses of Genesis symbolize six signs of the Zodiac Cancer to Sagittarius. This same symbolism is laid out in the frescoes in the Life of Christ (six zodiacal signs) and the Life of Moses (six calendar months).

The MATRIX OF WISDOM is the beginning of creation: Birth of Consciousness and its 10 x 10 matrix is a direct commentary on the MONAD: i.e. ALEPH א. Remember that ALEPH א is silence; though, it radiates out the primordial concepts exuding out of the MATRIX OF WISDOM. ALEPH's א silence is why it could not be the first letter of Genesis. The whole of the first chapter of Genesis is to explain via the vernacular: REVEALED and COVERED what ALEPH א is all about. The entire Judaeo Christian Scriptures is about the MATRIX OF WISDOM: i.e. ALEPH א: WORD OF GOD.

The MATRIX OF WISDOM as seen here is the origin of the two-part psyche: ego-consciousness and the unconscious mind. Comparing the Vesica Piscis in the MATRIX OF WISDOM in relationship to the above image showing the twelve zodiacal sign in the matrix illustrate again why the Torah would be considered the Holy of Holies: Garden of Eden. The Vesica Piscis is another symbol symbolizing the Merkabah. The sacred scripture is the seat of the Merkabah.

MATRIX OF WISDOM
UNIVERSAL MATHEMATICAL MATRIX:
Prima Materia (Perennial Matrix)

9	9	9	9	9	9	9	9	9	9
9	1	2	3	4	5	6	7	8	9
9	2	4	6	8	1	3	5	7	9
9	3	6	9	3	6	9	3	6	9
9	4	8	3	7	2	6	1	5	9

9	7	5	3	1	8	7	4	2	9
9	8	7	6	5	4	3	2	1	9
9	9	9	9	9	9	9	9	9	9

ALEPH א is spelt out: Aleph א (1), Lemmed (30) and Pei פ (80), which exudes the Gematria value of one-hundred and eleven (111); thus, ALEPH א symbolizes the Trinitarian Paradigm: Trinity; for the reason that one-hundred and eleven (111) encompasses ALEPH א (1): Archetypal, YUD י (10): Existential and QOPH ק (100): Cosmic. This becomes important to understand in the first word of Genesis: BERESHITH.

ALEPH א, additionally, spelt out: Aleph א (1), Lemmed (30 - 3) and Pei פ (80 - 8) exudes the numerics 1, 3 and 8, which can be seen as 138, which is the transposition of the number 318, which is the Gematria value of the CROSS +. The symbol of the CROSS + becomes extremely important to understand in the first word of Genesis: **BERESHITH** בְּרֵאשִׁית; for the reason that, **ALEPH א** sits between the letters **RESH ר** and **SHIN ש** in the letter/word **RESH ר**, which is inserted into the first letter of Genesis: BETH ב to format the word **BERESHITH** בְּרֵאשִׁית.

ALEPH א symbolizes the CROSS + is; for the reason that, symbolically on a spiritual level it comes from the north, which is the right hemisphere of the brain. I am not suggesting that this is precisely what is transpiring, I am merely pointing out how the ancient symbolized this concept seeing the whole of the Judaeo Christian Scriptures is about the two-part psyche and its relationship to Christ consciousness.

BETH ב spelt out Beth ב (2), Yud י (10) and Tav ת (400) symbolizes the sun (Yud י) going from the east and setting (dying) in the west or it can be said that BETH ב is genuflecting: ego-consciousness deflating its hubris allowing spirituality to come into its existence. Either way the reader wants to look at it ego-consciousness: Yud י is no longer in control; thus, when RESH ר comes down from the north and passes through the east-west corridor of time it creates a CROSS +, which puts RESH ר in the north and SHIN ש in the south and ALEPH א is facing upward; contrarily, BETH ב is in the east and TAV ת is in the west and YUD י is facing downward; thus, a spherical (three dimensional) CROSS + is created ethereally in the first word of Genesis: Bereshith. The center of said CROSS + would be QOPH ק, which is the next Hebraic letter schedule to enter creation.

Most important to understand about the MATRIX OF WISDOM is that it silently speaks of a duel system wrapped up into the MATRIX OF WISDOM. It is up to the initiate to transform the MATRIX OF WISDOM into the Eternal Temple of God, which is the format: Genesis Formula that causes creation to commence.

4	1	3	1	2	2	1	3	1	4
---	---	---	---	---	---	---	---	---	---

Creation as outlined in the first chapter of Genesis is all about the spiritual creation watched over by Christ consciousness not the materialistic creation governed by the tyrannical ego-consciousness.

These ten numbers/letters pattern seen in the first row of the MATRIX OF WISDOM's Genesis Formula infers the entire matrix. This is incessantly how the bible is written it infers far more than it REVEALS and it is up to the initiate to envisage that mystically cloaked data.

What I have come to call the Genesis Formula is envisaged through the first word of Genesis: Bereshith. When studying the first word of Genesis: Bereshith coupled with understanding the mythoi of the Hebraic Coder as outlined in the Prologue of the Zohar it is not difficult to extrapolate out the first word of Genesis: Bereshith into a ten numbers/letters pattern where the Hebraic Coder appear to be coming into and going out of creation. That appearance of the Hebraic Coder going in and out of creation would be a slanted perspective as to what is symbolically truly happen on a spiritual level. Yes, the Hebraic Coder writes the sacred scriptures from east-to-west (right to left); because, that symbolizes the east-west corridor of time. That is the way the deflated ego-consciousness has to write the sacred scriptures in the Garden of Eden; however, spirituality comes into creation from north. I have already written extensively on this matter. RESH ר come into creation symbolically from the north and destroys the old heaven and earth: BETH ב and creates a new heaven and earth (raison d'être) for the initiate.

The above pattern of the MATRIX OF WISDOM: Genesis Formula comes about by the two halves of the MATRIX OF WISDOM: ego-consciousness and the unconscious mind mirror imaging each other. What is meant by this is that the first half of the MATRIX OF WISDOM's numbers is diametrically opposite to the second half of the matrix.

Two-Part Psyche	Two-Part Psyche	Preliminary Eternal Temple of God	Eternal Temple of God	Eternal Temple of God

It is extremely difficult to envisage that the MATRIX OF WISDOM has to be realigned seeing that numerically it is a perfect 10 x 10 matrix. This is how the average person feels about his philosophy on life; yet, he or she is actually in total conflict with his or her psyche. The average member of the laity in all religious cultures does not even know that this MATRIX OF WISDOM is even part of the equation when reading their sacred scriptures; yet, every religion on the face of the earth uses this 10 x 10 matrix as the foundational architectural schematics to build their temples. For the average person to see these images and never having heard or seen them before makes the whole dialogue about the MATRIX OF WISDOM seem ridiculous; for the reason that, it is not in mainstream thought. Knowledge of this magnitude does not come all at once it come line upon line here a little and there a little until the whole becomes psychically comprehensible (leavened).

Finally, I want to point out one of the most important techniques that the ancient sages used to write the sacred scriptures. Hebrew letters and/or word originally did not have vowels, dots or tittles. The letters are blank and have their own symbols and definitions; thus, initially the Torah was written on a totally symbolical level to be read letter by letter in order to lay out the WORD OF GOD from a purely spiritual perspective.

Below I show the present Torah (three random verses) with the vowels, dots and the tittles, which are used to lay out the mythoi of the surface textual storyline: i.e. the slanted perspective.

Below the same three verses with have the vowels, dots and tittles rip out of the Torah's surface storyline; though, I don't particular agree with Strong's Exhaustive Concordance (SEC) it is the best work there is at present on the Hebrew words used in the Torah. More often than not the words of the texts do not agree with SEC and I also provide the Gematria value of each word.

I will end the discussion here and leave all other evaluations of the data presented for the reader to consider for him or herself.
