

THE MONAD (#1)

SILENTLY SPEAKS OUT ABOUT THE WHOLE UNIVERSE

Modernity would think it inane to believe that the MONAD (#1) silently speaks out about the whole universe; nonetheless, that is the whole truth and nothing; but the truth. The MONAD is the soul, self, God/Man Christ.

Those that have read my published works¹ and academic and independent academic papers will know that I have proven with incontrovertible mathematical evidence the existence of the divine deity, which humanity calls God. I do not believe there is a God, I know there is a God; however, most of humanity believes there is a God; but, does not know there is a God.

THE SOUL'S TWO-PART PSYCHE										THE SOUL'S TWO-PART PSYCHE										YAHWEH (Evil)					ELOHYM (Good)				

The above three images symbolize what Judaism calls SHECHINAH (Divine Presence)², which I called the MATRIX OF WISDOM for many years after I intuited it in 1994 in my mathematical researches on Dante Alighieri's La Divine Commedia (The Divine Comedy). The SHECHINAH (Divine Presence) is a commentary on the MONAD (#1). After many years went by, I learned through my researches that all religions, mystery schools, and indigenous natives around the world in all times and climes knew of this matrix; but the masses, in all cultures, were never taught anything about it; yet, throughout the world in all times and climes literature, architecture, artworks, etc. were esoterically created solely based upon what this matrix was silently conveying to those that were attentive to its structure.

Those that study this matrix will see that it is structured via the first nine multiplication tables (casting out nines). As most people know, in the United States Public School System every student carries a notebook with the first twelve multiplication tables outlined in the inside cover. I find it incredible that every student is given the secrets of the universe; yet, nobody tells them what they have in their possessions.

Those that study the structure of the multiplication tables will realize that every multiplication table after the first multiplication table copies the structural pattern of the first multiplication table. That is why this matrix only has structured to it the first nine multiplication tables; because, any multiplication tables beyond the number nine is merely repetitious of any of the first nine multiplication tables.

The first multiplication table is mere adding another single digit to the next digit; thus, two ones equals TWO, three ones symbolizes THREE, etc., etc. Therefore, when the attentive initiate looks at the second multiplication table, he or she will see that the number second multiplication table copies what it see the first multiplication table doing; thus two twos is four, and the number four is the second number in the second multiplication table and three twos equals twelve: i.e. reduced down to the number three, and it go continuously on repetitively from each of the other multiplication tables.

It is obvious that numbers are a communication system; because, the attentive reader will see that I have colored each of the numbers in accordance to the Sun Signs of Astrology. Numbers are merely names or mythoi that human define numerical digits.

1 & 8 = Mars, 2 & 7 = Venus, 3 & 6 = Mercury, 4 & 5 = Moon & Sun	Aquarius & Capricorn Time/Space Continuum	Pisces and Sagittarius Timelessness

Image A above is blanked out of colors. If the average person was to see this matrix bland like that, they would simply disregard it. I colored coded the numbers in the manner that is seen in image B; because, it is obvious that the first four multiplication tables are in reverse of the fifth to the eight multiplication tables (casting out nines). From that perspective it can easily be envisaged that the first eight multiplication tables symbolize the Sun Signs of Astrology (see image D). The most fascinating thing that I envisaged in putting this matrix together was realizing that from all four directions of the matrix the arithmetical data is the same. The SHECHINAH (Divine Presence) matrix is perfect with no flaws in it at all.

Another amazing aspect about the matrix is that the matrix is split into two parts (see image C) illustrating that the soul's two-part psyche: ego-consciousness and the unconscious mind splits into duality. The soul is wholly the MONAD (#1), which has no parts to it; thus, when the soul psychically enters the phantasmagoria of the psyche, the soul splits into two-parts creating a dualistic reality of opposites.

Those that study the matrix will see that the first eight multiplication tables symbolize Mars (1 & 8), Venus (2 & 7), Mercury (3 & 6), and the Moon and Sun (4 & 5); however, that is only two-thirds of the twelve constellations of the Astrological Zodiac. However, I understood that the three by three square numbered by the numbers threes and sixes was called the Kamea of Saturn; thus, that input Aquarius and Capricorn into the matrix. The number threes and sixes have twice the number of cells as all the other numbers (1, 2, 4, 5, 7, 8); thus, that is why I believe threes and sixes have two meanings.

I understood that Saturn governed Aquarius and Capricorn symbolizing the Father of Time: Cronus/Saturn. Jupiter that governs Pisces and Sagittarius symbolizes Timelessness: CHRIST.

Those that know how the Zodiac/Calendar year was structured by Julius and Augustus Caesars will have already envisaged that mystically codified to the Zodiac/Calendar year is the STAR OF DAVID, which symbolizes CHRIST. Notice how the four signs (1, 3, 6, 8) with 30-days formats a butterfly pattern; whereas, the other eight months formats an additional two butterfly patterns. When all three butterfly patterns are put together, they format the STAR OF DAVID. This is the star the three wisemen (astrologers) followed to the birth site of Jesus Christ.

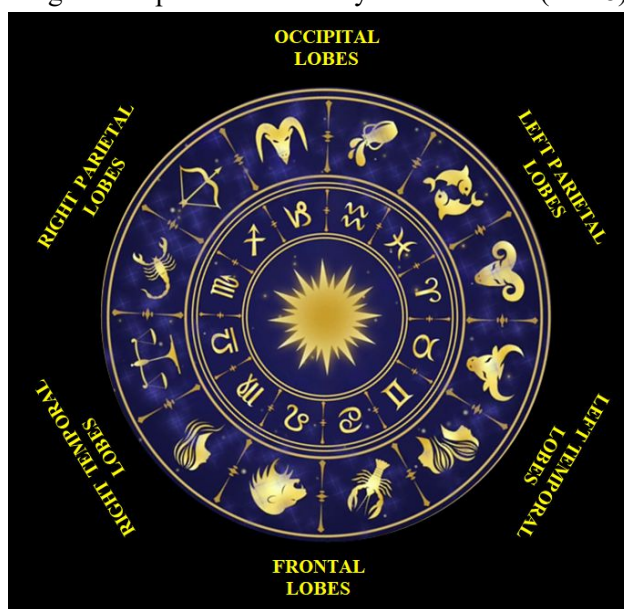

I place this image of Astrology, circled by the cerebral lobes of the brain, in this manner to have the reader realize that when he or she faces another person the reader is viewing that person right side on his or her left side or viewing the other person's left side on the reader's right side. It is like looking in a mirror.

It is obvious, at least to me, that Astrology was created; because, the essences of Sun Signs of Astrology coincided with the cerebral lobes of the brain. The Right side of the brain symbolizes the unconscious mind and left side of the brain symbolizes ego-consciousness; whereas, the frontal lobes of the brain, which is in the west facing east, symbolizes ego-consciousness and the unconscious mind in the state of Active Imagination (Christ consciousness); however, outside of Active Imagination ego-consciousness simply dismisses the unconscious mind as if it didn't exist; because, it is too enamored by its biases, prejudices, and preconceived notions: "GO WEST YOUNG MAN", where the sun sets (Old Freemasonry slogan). In the rear of the brain is the occipital lobes of the brain, which is in the east where the sun arises. Thus, Astrology illustrates that the soul's entire universes is between the ears: BERESHITH בְּרֵאשִׁית "In the Skull".

The outer world (blank abyss) does not exist, it never did exist, and it never will exist. The whole universe that the soul two-part psyche: ego-consciousness and the unconscious mind exist in, is its own phantasmagoria, which is an illusion of the outer world (blank abyss).

What I have discussed above is merely a brief commentary on the human skull. There is a great deal more research about all this, that I discussed in my most recent work³.

The human psyche receives its thoughts from its soul once the Unknown God, in the east symbolizing the galactic core, blesses it and then that data comes through the right side of the brain: unconscious mind coming down from the north (Northern Cross) and crosses the east-west-corridor-of-time (Nave-Apse of the psyche's belief system) going south to the left side of the brain: ego-consciousness. The west: ego-consciousness and the unconscious mind via Active Imagination returns to the east what it has gleamed from its raison d'être that had been cleansed by the Unknown God.
