

ARCANA TAROT CARDS and ASTROLOGY have absolutely nothing to do with Fortune Telling and Gambling (con games)

Most human beings go throughout their entire lives as if they were barbaric FOOLS, which is analogous to putting on the robes of the modern day: archetypal Marseilles Major Arcana Tarot Cards.

These uninitiates are analogous to how children play games with their toys. EXAMPLE: a child: FOOL (no matter what age he or she is) looks at a doctor, which is analogous to the cosmic Rider-Waite Major Arcana Tarot Cards or whomever he or she plays the game to imitate and then plays the game of attempting to imitate what he or she conjures up (imagines) what doctors do. This sounds inane to the society that modern man lives in; nonetheless, it is absolute truth. The Marseilles' FOOL symbolizes an animal, which is totally opposite to the Rider-Waite FOOL that symbolizes civility: Christ consciousness.

It would be difficult for an uninitiate to understand that the entire Bible: sacred scriptures, is a mathematical masterpiece, which has a countless amount of esoteric (hidden) data repetitively repeating itself, which the human eye cannot read verbally. All of this esoteric (hidden) knowledge codified to the biblical texts is derived from a ten square matrix that Judaism calls the Shechinah (Divine Presence), which in itself is a terse commentary on the MONAD: number one (1). This matrix, believe it or not, symbolizes a commentary on the MONAD: soul, self, God/Man Christ. The mathematics of the ten square matrix: Shechinah (Divine Presence) is essentially formatted via the first nine multiplication tables: casting out nines, which is taught to every grammar school student in the USA public schools; however, that is about as far as what is taught regarding the numerical data in this ten square matrix.

This above image of the Shechinah (Divine Presence) is not color-coded; but each multiplication table is reduced down by casting out nines. I personally intuited this matrix (1994) in my mathematical analysis on Dante Alighieri's La Divina

Commedia's Mathematical System. Later I would discover via my researches that this matrix was known all over the world by all cultures in all times and climes. Thus, by showing this matrix in this manner, I am illustrating why most uninitiates would never envisage the esoteric (hidden) data that mystically appears in it. As I have said, this matrix is a commentary on the number one (1).

I color-coded the matrix's numerical digits; because, I envisaged the pattern that symbolizes the Sun Signs of Astrology:
Blue = Aries and Scorpio ruled by Mars,
Yellow = Taurus and Libra ruled by Venus, **Red = Gemini and Virgo ruled by Mercury,** **Green = Moon and Sun ruled by the Moon and Sun.** This pattern is seen on all four sides of the matrix; thus, the matrix is perfectly mathematically structured.

There are four Astrological signs that are not clearly seen; however, the red equal lateral cross laid out on the whole matrix obviously symbolizes the Kamea of Saturn, which is a three by three square; thus, the Kamea of Saturn symbolizes Aquarius and Capricorn ruled by Saturn symbolizing TIME.

Whereas, Piscis and Sagittarius ruled by Jupiter (Christ) are totally invisible symbolizing TIMELESSNESS; because, they symbolize the Big Bang that radiates out of the center of the matrix. The last book I wrote: **MAJOR ARCANA TAROT CARDS Secrets Esoterically Revealed¹** explains all this in greater detail.

What I am trying to illustrate in this paper is that, basically that which is not normally envisaged by the uninitiate, is in plain sight. **"There are three kinds of people. Those that see, those that see when shown, and those that do not see".**

The Shechinah's (Divine Presence) matrix is essentially the human psyche. The entire Bible: sacred scriptures is written in this manner. The Shechinah's (Divine Presence) matrix: the psyche, is a gift from the Unknown God. In the book mentioned above the second chapter literally proves with incontrovertible evidence that there is a God; though, it cannot be seen in any shape or form. This Shechinah (Divine Presence) matrix literally symbolizes the star-studded universe and it

literally illustrates that the Unknown God exist outside of the time/space continuum. There are many other images in the Shechinah's (Divine Presence) matrix.

Read the first day of creation where it says, "*Elohyim said/desire that there be LIGHT and there was LIGHT*". LIGHT in reference to this statement literally means **comprehension**. The word LIGHT has the gematria value of two-hundred and seven (207), which symbolizes the four elements (Earth, Air, Water, and Fire) which are outlined in the first four days of creation, which have a total of two-hundred and seven (207) words and that is no coincidence. Whereas the fifth and six days of creation has a total of two-hundred and six (206) words, which is the amount of bones in the human body and that is no coincidence. The bones in the human body are in the realm of DARKNESS; because, they are covered by the human skin.

The last three papers that I wrote in this Academia site would aid the reader in understanding what I am trying to convey. The esoteric secrets hidden in the Bible: sacred scriptures, artworks, architecture, Tarot Cards, etc. are merely examples of what is hidden in life in front of the average human being. Religions and mystery schools are basically trying to make people pay attention to what they are confronted by. Most people out in the world claim to be friends and family; however, they are willing to con anybody if it gives them finances that they themselves have not earned. Also, it must be understood that the spiritual forces of creation: The Unknown God gives this hidden knowledge to all souls in all creation in all times and climes; however, each person has to do the research on his or her own volition, which is essentially the true manner of praying. When the initiate does the research on his or her own volition it is in this manner

that the Unknown God answers the researcher's prayers. A researcher can be anybody trying to obtain a profession in college or through his or her own researches.

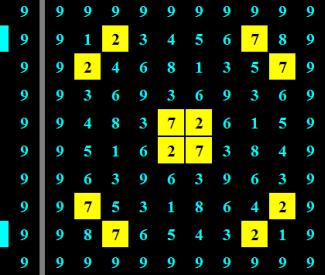

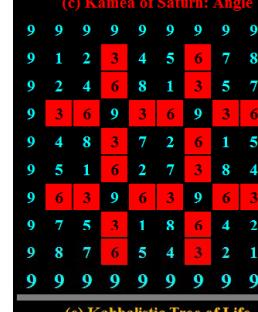

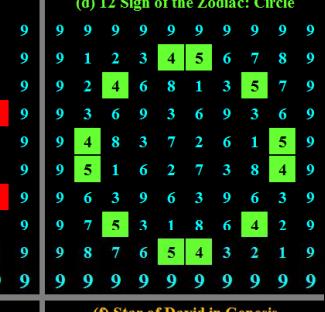

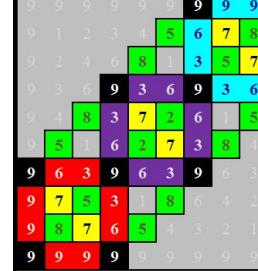

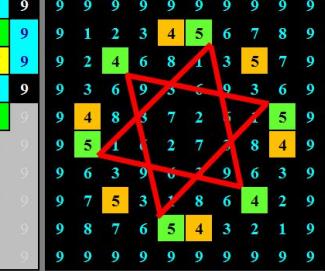

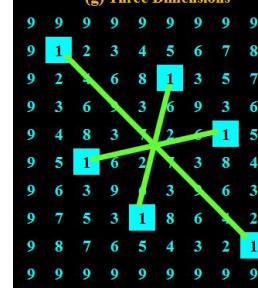

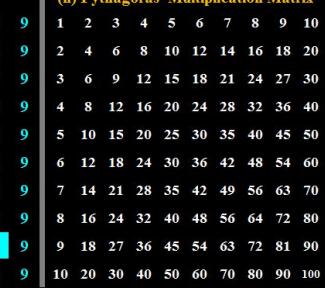

On the previous page I place an image of the GRA Kabbalistic Tree of Life with the Major Arcana Tarot Cards aligned to the three Mother letters, seven Double letters, and twelve Single (Elementary) letters. Thus, those initiates that understand how the Hebrew Coder is aligned to the Major Arcana Tarot Cards will envisaged that this image coincided exactly with how the 32-Elohyms are sequentially aligned to the texts of the first chapter of Genesis.

This above image symbolizes the 32-Elohyms aligned sequentially in a circle and Elohyms via the three Mother letters (**SHIN ו [300], ALEPH א [1], MEM מ [40]**) = 341, which is the transposition of the small formula for PI 3.14) divides the LIGHT (first four days of creation) from the DARKNESS (the fifth and sixth days of creation).

Those that understand the images of the Tarot Cards will understand why the EMPEROR, JUDGEMENT, and DEATH are on the central column of the GRA Kabbalistic Tree of Life, which also symbolizes diving the LIGHT from the DARKNESS. My resent book explains what these three cards symbolize.

The twelve singles (elemental) letters symbolize Astrology, which is a mathematical science not invented by humanity; but, is a gift that the Unknown God provided the soul.

The first word of Genesis is BERESHITH, which means that everything takes place “**IN THE SKULL**”. This is no joke. The twelve signs of Astrology coincide with the cerebral lobes of the brain. Everything about all religions and all mystery schools is solely about what takes place in the human skull’s psyche. See images on the next page.

Look at the center of the Shechinah's (Divine Presence) matrix, which has four cells **two twos and two sevens**. When number seven is divided by the number two the quotient is three and one-half ($3\frac{1}{2}$), which symbolizes the three and one-half coiled Kundalini Serpent, which symbolizes the **LIGHT: comprehension**; because, in the center of these four cells ALEPH א radiates out all creation. The center of these four cells symbolizes the Pineal Gland. ALEPH א symbolizes an invisible letter and is eternally silent. This is why the Tetrahedron [YAHWEH יהוה] creates the Hebrew letter ALEPH א hieroglyphically.

Most people in the west believe that the Kundalini Serpent is solely from Hinduism; however, those that study the Old and New Testament and the Hebrew Coder will envisage that Judaism and Christianity are all about the Kundalini Serpent.

The Shechinah's (Divine Presence) matrix has many images to it that includes the four elemental signs, and the GRA Kabbalistic Tree of Life and the Star of David, which are all codified to the first chapter of Genesis. None of this is coincidental; because, the Shechinah's (Divine Presence) matrix is a commentary on the MONAD: soul, self, GOD/MAN Christ. The reader should study the first chapter of Genesis word for word on a mathematical level and it will be easily envisaged that the STAR OF DAVID in the matrix is precisely the same STAR OF DAVID codified to the first chapter of Genesis. And the same pattern of the GRA Kabbalistic Tree of Life in the Shechinah's (Divine Presence) matrix will be seen codified to the first chapter of Genesis. This is no coincidence; because, it is obvious that these sacred geometry images in the Shechinah's (Divine Presence) matrix were deliberately codified to the first chapter of Genesis.

The outer world (blank abyss) does not exist, it never did exist, and it never will exist.
